Professional Summary

I am a motivated and results-driven Computer Scientist graduate with a degree from Cavendish University with hands on experience in developing innovative software solutions. During my final year I built a hospital management system featuring an AI based diagnosis assistant that helps patients identify possible disease outcomes. I have a solid foundation in programming, data structures, networking and emerging technologies complemented by practical experience in web development, Artificial intelligence and software engineering. Eager to apply my technical expertise and problem solving abilities in a professional setting, I am passionate about my leveraging technology to create efficient, impactful and usercentered solutions. Adaptable and Collaborative, I am ready to contribute to dynamic teams and tackle real world challenges from day one.

Professional Experience

Managing Director

Flopet Investment Limited

May 2025 - Current

- Provide strategic leadership and oversee company operations, driving business growth and operational efficiency across all departments.
- Foster a collaborative and high performance culture through Regular performance reviews, feedback loop and skill development activity.
- Spearhead partnership and financial planning initiatives ensuring sustainable, profitability and alignment with long term strategic goals.

Data Clean-Up Clerk

Shreeji investment LTD-MTN BPO

December 2024

- Identifies and removes redundant or outdated records, such as old customer accounts or inactive service entries, to maintain a clean and efficient database for operations and analytics.
- Ensures customer details like name, address, contact numbers, and account details are accurate and up-to-date. This may involve fixing typos, removing duplicate records, or updating outdated information.
- Verifies that the data aligns with legal and regulatory standards, such as data privacy laws (e.g., GDPR), by ensuring sensitive customer information is handled securely and unauthorized or unnecessary data is purged.

Production Assistant

Jamiel Banda Photography, Lusaka

March 2021 – November 2022

- Assisted with the relocation and setup of technical equipment, ensuring compliance with safety standards.
- Coordinated the installation and configuration of specialized production equipment for various multimedia projects.
- Collaborated with cross-functional teams to deliver high-quality productions within tight deadlines.
- Gained practical experience in photography, video production, and post-production workflows.

•

TV Ad Model

MTN Zambia, Lusaka

November 2021

- Featured as a model in a television advertisement promoting a product campaign. • Followed direction from creative teams to accurately portray the campaign's vision and message.
- Participated in pre-production rehearsals and on-set activities to ensure seamless execution.
- Contributed to the successful launch and engagement of the advertising campaign by delivering a compelling performance.

Education

Bachelor of Science in Computing

Cavendish University Zambia, Lusaka, Zambia

August 2021 – June 2025

- Focus Areas: Software Engineering, AI, Data Structures, Networking -

Key Projects:

- Developed a full-stack job application platform using React.js and Node.js.
- Implemented ML algorithms for data classification and prediction.
- Built robotics software integrating Arduino sensors and automation logic.

Grade 12 Certificate

Chelston Secondary School, Lusaka, Zambia

2018 – 2020

- Graduated with strong grades in Mathematics, English Language and Commerce.

Qualifications

Degree in Bachelor of Science in Computing

Grade 12 Certificate

Certificate in Programming Foundations with JavaScript, HTML and CSS (Coursera)

Certificate in How to create a website in a weekend (Coursera)
Certificate in Generative AI with Large Language Models (Coursera)
Certificate in Generative AI for Everyone (Coursera)
Certificate in Operations Research 3 part Course (Coursera)
Certificate in IBM Introduction to Machine Learning (Coursera)

Technical Skills

- Programming Languages: Python, JavaScript, Java
- Web Development: HTML, CSS, React.js, PHP
- Software Development: Agile Methodologies, Git/GitHub
- Databases: MySQL, PostgreSQL, MongoDB
- Artificial Intelligence: Machine Learning, Neural Networks
- Robotics: Arduino Programming, Sensor Integration
- Multimedia: Photography, Video Editing, Color Grading

Other Skills

- Analytical Thinking: Strong ability to analyze complex problems and develop scalable solutions.
- Team Collaboration: Proven ability to collaborate within interdisciplinary teams, ensuring project goals are met efficiently while maintaining a cooperative and respectful environment.
- Effective Communication: Skilled in conveying complex technical ideas clearly and concisely, both in writing and in person. Adept at receiving and integrating feedback to align team objectives.
- Creative Thinking: Demonstrates innovation in problem-solving and project execution, with a flair for unique approaches and user-centered designs
- Systems Analysis: Experienced in examining business and technical processes, identifying performance bottlenecks, and recommending enhancements for improved operational efficiency.

Languages

- English (Fluent)
- Nyanja (Fluent)

Hobbies and Interests

- Reading tech and innovation blogs.
- Traveling to explore diverse cultures and perspectives.
- Gaming, focusing on problem-solving and strategy-based games.
